Dear Hiring Manager,

I, Nishtha Saxena, am a final year student pursuing a B.Tech degree at <u>Indian Institute of Technology</u>(IIT), Delhi, India. With great willingness, I am applying for the position of Software Developer at your esteemed organization. Therefore, not missing any chance, I have good knowledge of **Data Structures**, **JAVA**, RESTful API, App/ Web Development with four internships viz. Autodesk, Youth4work, WedAbout, GoNoise and want to dig deeper into Software Development.

I have a keen interest in new technologies and build low maintenance, efficient and brief code for best performance and enhance my knowledge. I have built LZW Compression, Bin Packing Algorithm using Hash, Linked Lists, Queues, and Shooting game, Paint using JAVA using Multi-Threading, Exception Handling. The expertise which I gained while working in the above-mentioned projects and internships perfectly align with the work requirements.

I am looking for opportunity which not only encourage me in Software but also supplement my existing skills with daily evolving technologies. <u>Being the best is not my agenda but development towards greater heights is.</u>

The appreciations which I received during my internships speak volumes of how motivated I am and keen to put my best efforts in a productive environment. I am focused on a career that provides me ample opportunities to use my analytical skills, prunes them to suit diverse areas and gives me opportunity for growth. Besides my analytical acumen, I am a proactive, innovative and highly motivated individual who strives to give her 100 percent. I am seeking a challenging but rewarding position and believe myself as a suitable candidate for the position required by the company.

I have ample experience of working under deadline pressure and have never given up. I am a fighter in challenging tasks. Working with professionals would provide me a great platform to access what I need to do to sharpen my skills and step up the ladder in the IT sector. With my background and experience, I believe I can efficiently contribute to the project I will be part of and eventually lead to the growth of the company.

I sincerely express my gratitude for considering my request and eagerly waiting for a response.

Sincerely,
Nishtha Saxena
